Three pillars of **Insights Hours**

**Product
spotlight**

**How-to
ThoughtSpot**

**Community
thread**

- Hosted **last Thursday of every month** by ThoughtSpot's GTM team
- Register for **one or all sessions**
- Ask your questions using Q&A for the **Community thread** discussions

Agenda

01 Introductions

Hello from speakers and what we'll cover today

02 Create new charts using Muze Studio

Manan Shah | Ujja Dutta

03 Analyst Studio - latest updates

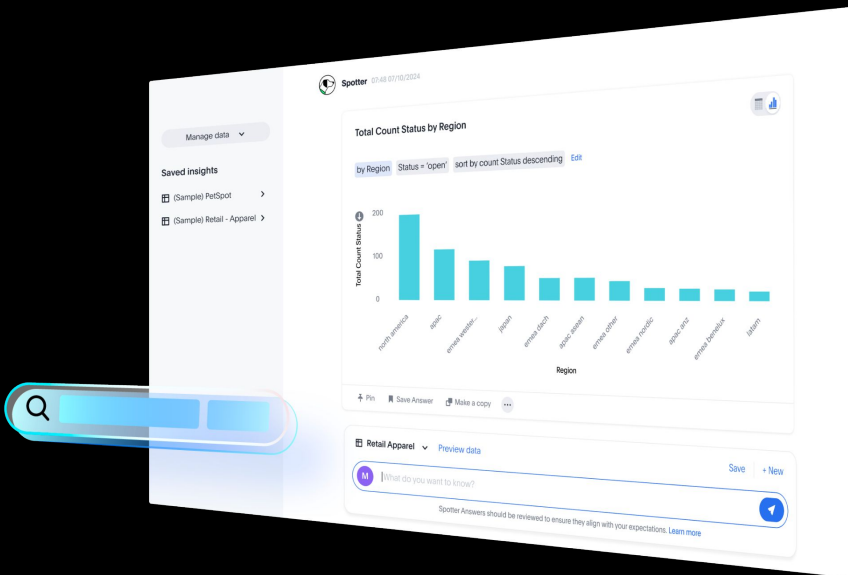

Aditi Dani

04 Mobile SDK

Himanshu Arora

05 Wrap up & next steps

Eliza Dee

NEW

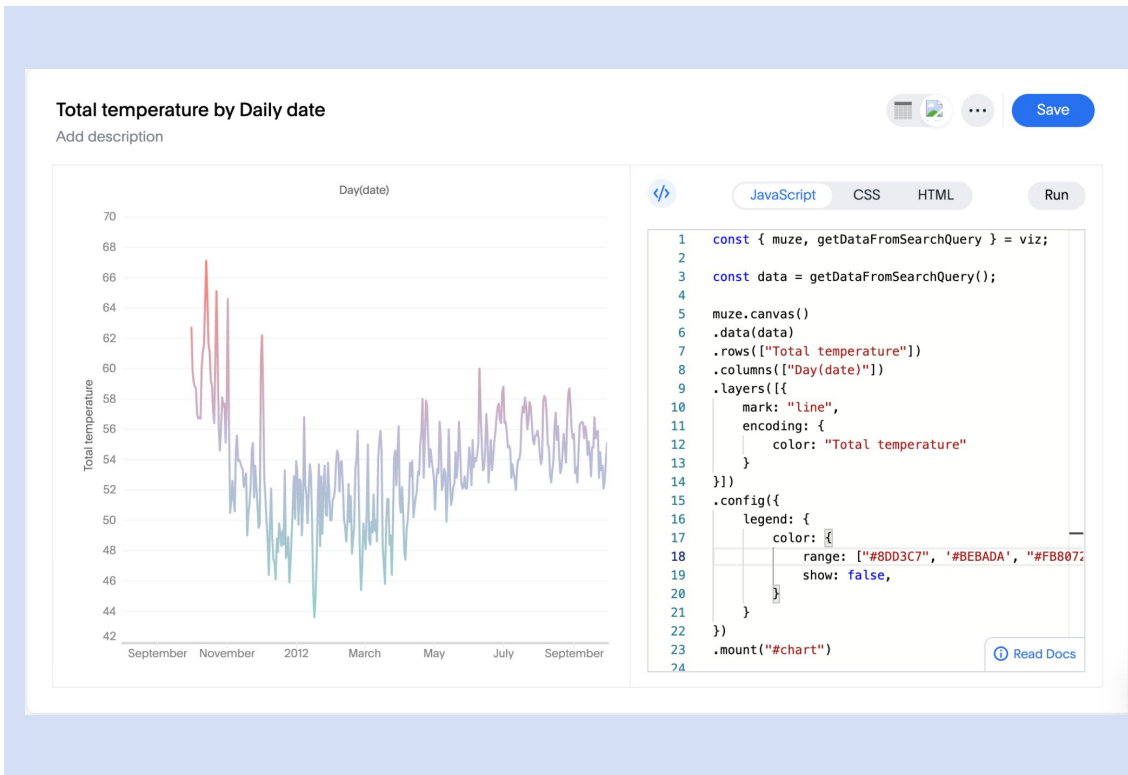

Create new charts using Muze Studio

What is Muze Studio?

Use code to create new types of charts and achieve pixel perfect control over these new charts

- Create custom visualizations on-the-fly using code through the Muze library
- Supports all native capabilities like drill down, cross filtering etc.
- No separate web hosting required to host the code
- No additional costs associated
- Detailed tutorials and examples to create 20+ kind of charts available [here](#)

When to use Muze Studio?

New chart types

When a particular cartesian chart type is not available as a native chart, users can create it using Muze Studio

This also includes creating infinite combinations of layers of Bar, Line, Scatter, and so on

Pixel perfect use cases

When you require granular control on charts that is not available in our UI / supported for native charts today. e.g. turning specific points on the chart to a particular color, adding custom labels etc.

How to

Mobile Embed SDKs

Mobile Embed SDKs

- Embed **ThoughtSpot Liveboards** in your Mobile Applications.
- **Whitelabel the liveboards** as per your mobile branding scheme
- Drilldowns, apply filters, use the power of liveboards in your mobile applications
- Web-view embed

Ease of embedding

- Similar functions to web-sdk
 - No new learning curve
 - Reuse (almost) the same codebase of web embed
- Platform-specific SDKs - React Native, Flutter, native iOS, native android
- Sample codes on GITHUB in all platforms.
- Events for deeper workflow integrations
- CSS flags for easy whitelabeling

A top-down view of a workspace. A person's hand is on a silver laptop. A black microphone on a stand is positioned above the laptop. A smartphone is on the right. A white cup of coffee sits on a cork coaster. Papers and a pen are on the left. The text "What's coming & next steps" is overlaid in the center.

What's coming & next steps

SpotGuide

Welcome to SpotGuide!

SpotGuide is your go-to hub for best practices, expert insights, and practical recommendations curated by ThoughtSpot's professional services and customer success teams. Here, you'll find everything you need to implement ThoughtSpot effectively, drive adoption, and maximize the value of your investment. Dive into the wealth of resources and strategies to help you confidently achieve your business goals.

Onboarding & Implementing ThoughtSpot

Defining a Use Case

Learn how to document the business context, challenges, success criteria, and the business user questions to be answered.

Access Controls and Security

Establish a strong security model to ensure effortless user access to necessary information, while also preventing unauthorized access and protecting security.

Data Security Field Guide

Learn about security controls, user frameworks, and best practices for data security, including scenarios, use cases, examples, and illustrations of data security governance.

Welcome to ThoughtSpot University

Learn anytime, anywhere. ThoughtSpot University is your central hub for all things training. Take on-demand, self-paced eLearning or register for instructor-led training classes and certifications.
