Eliza

Upgrade Sequence

ThoughtSpot Analytics

- 10.2.0 cl release was consolidated in 10.3.0 cl release (October)
- 10.3.0 cl release is followed by 10.4.0 cl release (November target)

ThoughtSpot Everywhere (Embedded)

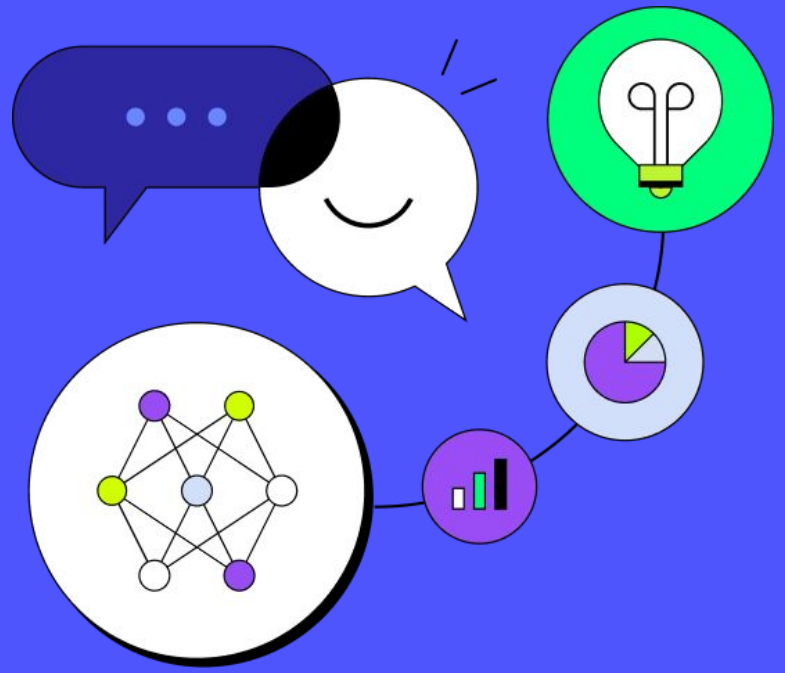
- 10.1.0 cl release
- 10.2.0 cl consolidated in 10.3.0 cl
- 10.3.0 cl PAUSED:
  - Are embedding ThoughtSpot's homepage
  - Are hiding ThoughtSpot's global navigation
  - Have the Sage Natural Language Search experience enabled
- **10.1.0** is followed by **10.3.0 cl** **or** **10.1.0** is followed by **10.5.0** cl (January)

No upgrades over the December holidays

ThoughtSpot

Release Highlights

10.3 cl release highlights



Create KPI alert direct from the watchlist on the new homepage

Early Access

You can now create any type of KPI alert that you know from a liveboard KPI chart directly from the KPI watchlist on your homepage (New Homepage UX).
You do not have to open the KPI containing liveboard anymore.

Liveboard schedules on Homepage

Early Access

Within the new homepage experience, business users can see schedules they are subscribed to while administrators can see all the schedules present in the organisation.
Users can quickly pause or resume schedules they created.
Users also can edit schedules they have access to.

There is also a flag you can set to prevent schedules from being sent to external email addresses.

Natural language search and object search

Natural language search and object search are now separated. To search for an AI-generated answer using natural language, enter your question in the search bar marked **Ask a business question in natural language** on the home page. To search for related Answers and Liveboards, enter your question in the search bar marked **Find existing Answers and Liveboards** in the top navigation bar.

Manage tags for Answers/Liveboards

You can now manage all your Answer and Liveboard tags from one convenient window. Just click the Manage tags button at the top of your list of Liveboards or Answers, then create, edit, and delete tags. To delete and edit tags you must have administrator privileges or the can manage tags role if RBAC is enabled. For more information, see Use tags to organize.
